 **Switch-Air Digital Convection Ovens Cooking Guide**  
Models XAF-195, XAF-188, XAF-135, XAF-130, XAF-115, XAF-111

Congratulations! You have just purchased a new Cadco Switch-Air Digital Convection Oven. Let's go over some of the basics before you start using your new oven.

Your new Cadco Switch-Air Digital Convection Oven will have one of two control panels which will provide the following functions:

**Classic control panel (XAF-130, XAF-111):**

- Set time
- Set temperature
- Set multi step operation
- Set up to 70 programs into memory

**Dynamic control panel (XAF-195, XAF-188, XAF-135, XAF-115):**

- Set time
- Set temperature
- Set humidity
- Set multi step operation
- Set up to 70 three step programs into memory
- Control (optional) models XAL135 & XAL195 Proofer functions

The first and most important step will be: Have your new oven hooked up to the proper power and (if applicable) water source. If there is any doubt about the proper power or the connections, have the oven installed by a qualified electrician according to your local codes.

The Cadco Switch-Air Digital Convection Ovens work on the principle of moving air. This air movement removes the "Hot Spots" so we get very even browning, rapid preheats (10 minutes), and faster cooking.

Here are some basic do's and don'ts for convection cooking:

- Use pans that have sides no taller than a common sheet pan.
- Preheat the oven to 50°F above your baking temperature.
- Set the oven for your desired cooking temperature after you have placed the food inside.
- If you notice uneven cooking, set the oven temperature down 25°/30°. Let the product tell you if it needs more or less heat.
- Aluminum foil can get pulled into the fan and cause damage.
- Don't overload the oven.
- Maintain a minimum 2"-3" between the product being cooked and the next shelf. Remove shelves if necessary.
- Your Cadco Convection Oven is a powerful tool, so don't hesitate to utilize its full capacity.
- Keep your oven clean. Wipe up spills as they occur. Never allow grease to build up on the interior of the oven, or collect on the bottom of the cooking cavity.
