3 The following screen appears. Click the Next button. 6 A screen appears to confirm that you want to close the elicenser installer. Press the Finish button. 4 The system displays the elicenser Welcome screen. Click the Next button to start the installation. 2 TASCAM Cubase LE 5 Click the Install button. 9 A screen appears where you can select the location where you want to install the software. Designate the location where you want to install the software and click the Next button. 8 The system displays the License Agreement for end users. Read the contents, then select I accept the terms in the License Agreement if you agree to the terms. Click the Next button. 10 A screen showing that preparation for installation is complete appears. Click the Install button. TASCAM Cubase LE 5 3 You can download updates for Cubase LE 5 from the following Steinberg website. We recommend that you always use the latest version. Please abide by all the precautions listed on the site before updating. Cubase LE 5 can be used for 30 days or launched 3000 times in demo mode until it becomes disabled. If you want to continue to use it for a long time please refer to the Getting Started on the DVDROM and register your program. 13 When the installation completes, press the Finish button to close the installer. 4 TASCAM Cubase LE 5 The following screen appears. Preparation 1 Launch Cubase LE 5 and select Device Setup from the Devices menu. 2 Click VST Audio System on the left side of the Device Setup window. Then, click OK to close the window. 3 When the following dialog appears, click the Switch button. TASCAM Cubase LE 5 5 Confirm that the Device Port is set to US144MKII on both the Input and Output tabs. Close the dialog after confirming. The windows should appear as follows and the digital input and output should be available for use. 6 Select New Project from the File menu. <http://flatfeecanada.com/userfiles/how-to-flash-a-nokia-phone-manually.xml>

TIP To use the digital input and output of the US144MKII as inputs and outputs for Cubase LE 5, add the digital input and output on the Input and Output tabs of the VST Connections window. Click the Add Bus button. When the following dialog appears, set the Configuration to STEREO and the Count to 1 and then click the OK button. A window appears that allows you to select a template for the new project. Choose the template that you want and click the OK button. 6 TASCAM Cubase LE 5 Select the folder where you want to save the project and click the OK button to complete creation of a new project. TIP When recording a vocal or an acoustic guitar, for example, with a single microphone, create and record to a mono track. When recording a piano in stereo with two

microphones or recording a keyboard or similar device using the stereo line input, create and record to a stereo track. NOTE If you choose the Empty template, use the Add Track item from the Project menu to add audio tracks. TASCAM Cubase LE 5 7 Press the Monitor button if you want to hear the input signal. 3 Press the REC button in the transport section to start recording. 4 When you finish recording, press the STOP button, then click the Record Enable buttons to turn it off the button indicator will turn off. Rewind if necessary. 5 Repeat steps 14 to overdub additional tracks. 8 TASCAM Cubase LE 5. On this screen, set the File Name, Path location where saved, File Format, Sample Rate, Bit Depth and other attributes of the file to be created. 4. The following screen appears while the file is being created. After the file has been created, press the Close button on the Export Audio Mixdown window to close it. As shown below, you can confirm that a track is stereo by the word stereo in the channel display and by the input display, which should say Stereo In or something similar, when the channel is selected. Q2. I would like to record two channels simultaneously in stereo. A2.

Before you record, choose Stereo tracks or add Audio tracks as Stereo. EQ OFF EQ ON 10 TASCAM Cubase LE 5 From the Project menu, choose Project Setup and then change the Length field. Q6. I burned a CD using the WAV file I mixed down, but the speed is obviously different. A6. Could the sampling rate of your project be set to 48 khz. If your ultimate objective is to create a CD, TASCAM recommends that the sampling rate be set to 44.1 khz from the beginning. To specify the sampling rate, choose Project Settings from the Project menu, then set the sampling rate to khz. Q7. I have connected an audio source to the Unit, but cannot hear anything. A7. Make sure that the input level of the audio interface is raised appropriately. When a signal is being input, the signal indicator of the audio interface will light up green. Make sure that the monitor or headphone level is raised, and that the connections are correct. TASCAM Cubase LE 5 11 If the signal is analog, the ideal level is when the overload indicator lights up red occasionally.
